

EMC Cable Screw Glands UNI HF Dicht, brass, metric, 25,0 - 20,0 cable, M 40 x 1,5 brass

EMV-Kabelverschraubung UNI HF Dicht

Product number 52219

Weight 1.405kg

Illustrations are for reference only. Technical specifications may vary and are subject to change without notice.

Product description

The functional effect of the gland is only achieved by a low-ohm transition resistance between the cable and line leads and the wall of the electrical unit, i. e. clean the contact surfaces or even better provide permanent bonding from inside by fitting lock nuts with equipotential bonding

- material: brass, nickel-plated
- material sealing insert: TPE
- protection spec.: IP 68 up to 10 bar
- temperature resistance: -20 °C up to +105 °C

Product properties

Screen diameter max.-min.	20,0 - 15,0 mm
Protection spec.	IP 68
Sealing insert material	TPE
Version	with iris feather
min. - max. cable diameter	25 - 20 mm
Cable sheath	abgesetzt
Type of packaging	10
Thread (AG)	M 40 x 1,5
Thread type	metric
GL	8 mm
H	27 mm
Temperature resistant	-20 °C – 105 °C
Material	Nickel-plated brass
